Weekly Cottom Review.

New York, March 3.—The week in the cotton market has been distinguished by a foray on the part of leading bulls at the expense of overloaded shorts, not only here and at the South, but also in Liverpool. The Mny option has reached a premium of Scents a bale over July, and has clung tenaciously to it even in moments of researched as the Stock Exchange, and the prices get a setback from a fall of quotations at the Stock Exchange, and the assumed that in the extra session another attempt will be made to pass the South santi-o tion bill. Moreover, the Liverpool spot as the south is described as dull: quotations, particularly in Texas, are said to have been shaded, trade in yarns and cloths, both at home and abroad, is not up to expectations, and finally while the advance of late has been largely due to what are termed speculative technical conditions, the short interest in rise of about 75 points has been considerably reduced. It is said that the short interest among trade is less, hedges of out-and-out speculators are still large, but the pressure to cover is not so great as it was some days ago. Meantime, too, reports from Texas and elsewhere at the South are done days ago. Meantime, too, reports from Texas and elsewhere at the South are to the effect that the soil is in good condition, that farm work is well advanced and that everything points to an unusually large acreage this spring. Some more of the initial corrections, it is said, are curtailing their production. The 1910 crop of Egypt is said to have broken all records; present visible supplies in this

country and Europe are with one exception the largest on record. It is, nevertheless, true, however, that these supplies are deceasing more rapidly than they were a year ago; that receipts at the ports and interior towns have latterly fallen off noticeably, and that the certificated stock at New York is steadily decreasing, having diminished during February nearly 5,000 bales. The movement of the East Indian crop is small. Some reports from Lancashire are to the effect that the plague and famine in China have thus far had no effect on the English trade in plece goods. Chicago reports state that while the improvement in business may be slow it is steady. Exports of raw octton from this country have recently been large. Considerable of the New York stock, it is said, would be shipped out in the near future. Finally bears have received such a sharp lesson within the past week that they are cautious. Powerful intorests identified with the metal trade own considerable of the New York stock and together with certain spot interests and a large Texas operator are believed to be keeping a sharp eye on Liverpool straddlers who made the original straddle by buying in Liverpool and selling in New York and also on other shorts.

# SALISBURY AGITATED OVER APPOINTMENT OF POSTMASTER
